

Hello everyone,

It has been awhile since we have sent pictures of what our room looks like. Attached are the areas we have set up in the room. The areas include:

- 1) **Block Area** or should I say the “Lego” area because it is so popular with the children.

- 2) **The Baby Area:** A home to our five babies. The children work together as a team to look after them (feeding, changing, bringing them to school, throwing birthday parties for them).

- 3) **School Area:** The children had an idea yesterday to create their own school. We have been busy setting it up yesterday afternoon and this morning. We have six teachers that teach different subjects and of course a principal and vice principal. Even the babies go to school. More details to come.

- 4) **Nature Area:** This area used to be our English Garden but we have now converted it to a farm. The children have also been busy making the farm, gathering nature items from outside and are currently building a fence. More details to come.

- 5) **The Quiet Area:** Our quiet area is for one or two children only, where they can relax and enjoy a good book.

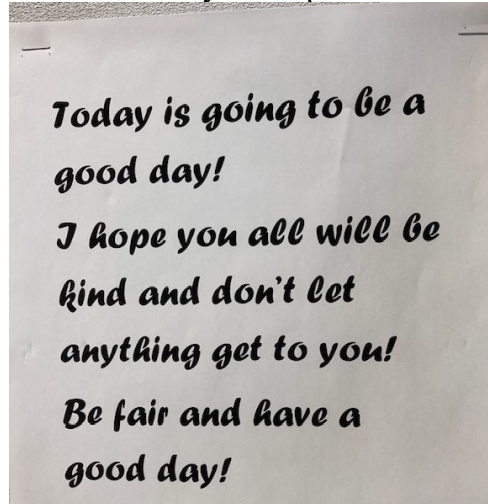

New to Programming:

We have slowly been implementing a “Kindness” time where we sit down and say one kind/ positive message to our peers.

We begin two mornings a week with a “ Pump Up” Speech. A teacher asks the children if there are any volunteers who would like to say positive words or a speech to start our day off on the right note. Attached is an example.

When everything is cleaned and our morning feel good song is over the child/ ren will stand at the door and say their speech **LOUD AND PROUD!** We all clap and cheer and go to school.

There are always so many positive and wonderful things happening in MAG 1 and all the teachers are so proud of the children!

MPR TEAM
